Notes:

⁽¹⁾ EBIT is defined as earnings (loss) before interest expense and provisions for income taxes. EBITDA is defined as EBIT plus depreciation and amortization. EBIT and EBITDA do not purport to represent net earnings or net cash provided by operating activities, as those terms are defined under generally accepted accounting principles, and should not be considered as an alternative to such measurements or as indicators of the Company's performance. The Company's definitions of EBIT and EBITDA may not be comparable with similarly-titled measures used by other companies. EBIT, EBITDA and EBITDA excluding special charges are among the indicators used by the Company's management to measure the performance of the Company's operations and thus the Company's management believes such information may be useful to investors. Such measures are also among the criteria upon which performance-based compensation may be based.
